

ATU Library How To: Find <u>eBooks</u> on the Library's Databases

There are thousands of eBooks available on the library's databases. The easiest way to find these eBooks is to use the 'Search + Find' feature on the ATU Donegal library's homepage <u>https://library.lyit.ie/</u>

Part 1: Carrying out a search and limiting the results to eBooks only

1. Type your topic into the search box on the library homepage and press the orange 'Search' button. In the example below I am looking for eBooks on research methods.

Search + Find

FIND P JOKS	EBOOKS	MORE SEARCH OPTICICS

2. This search has returned over 17 million results from across the library's databases. The results include, articles, eBooks, conference papers, reviews, trade publications etc.

To refine the search, click on 'Advanced Search', just below the search box.

3. Advanced Search gives you more fields to fill in so you can refine your topic. You can add in more blank fields using the + button

7. The results still include, articles, eBooks, conference papers, reviews, trade publications etc. There are a number of different filters on the left-hand side of the screen, to refine your results further.

To limit it to just eBooks, select 'eBooks' underneath 'Source Types' (beneath the date slider)

Now, all the results on the screen will just be eBooks on your search topic.

Part 2: Reading the eBook and downloading chapters

ATU Libraries use two main suppliers for eBooks, EBSCO and ProQuest. They will display slightly differently in your search results, but can be used in the same way

EBSCO eBook

ProQuest eBook

We will look at using the EBSCO eBooks first.

1. From the results page, click into the *title* of the eBook you wish to read.

2. EBSCO uses a number of different databases to get eBooks results. The different databases have different options for downloading the eBook. I recommend always choosing the '**PDF Full Text'**, rather than 'Full Download'. PDF Full Text enables you to download individual chapters rather than the entire book.

3. This image shows all the individual chapters of the book. You can click into any chapter and read it on screen or download the individual chapter by clicking on the Download symbol beside the chapter name.

4. Another useful feature, when you chose PDF Full text, rather than Full Download, is the 'Search Within' tab – beside the Contents tab of the book.

'Search Within' enables you to search for words and phrases throughout the entire eBook.

5. To return to your results page again, simply press the back arrow in the toolbar.

Now we will look at using a ProQuest eBook.

6. From the results page, click into the *title* of the eBook you wish to read, or click on the blue 'click here to access eBook'

7. ProQuest books cannot be downloaded in full, but you can download individual chapters.
